

irlen EGYPT

is the latest addition to numerous Irlen centers in 46 countries worldwide where the science of colors transforms lives. With discovery, you will dive into the amazing colorful world of Irlen. It will be a lifetime change when kids and adults who suffered silently from a distorted world will start leading normal lives. They will discover a world they have never lived before. Now, they have the chance to unleash their reading and writing abilities. Kids with learning difficulties will gain their right to learn. They will start to better comprehend what they read; and will even read for pleasure. It will be a turning point in the academic careers of kids who suffer only from Irlen Syndrome. For other kids with ADHD, Autism, and Learning Difficulties, the Irlen Method will remove a layer of the problem which eventually leads to more effective interventions.

Life-Changing Colorful Solutions

SYMPTOMS OF Irlen SYNDROME INCLUDE:

- ◆ Sensitivity to bright and fluorescent lighting and glare
- ◆ Slow or inefficient reading
- ◆ Poor reading comprehension
- ◆ Poor attention and concentration
- ◆ Eye strain
- ◆ Fatigue
- ◆ Headaches and migraines
- ◆ Poor depth perception

Irlen Syndrome is a perceptual processing disorder caused by the brain's inability to process specific wavelengths of light. Irlen Syndrome is not a problem with the eyes, it is a problem with the brain

COLORED OVERLAYS

Irlen SYNDROME AFFECTS

- ◆ 12-14% of general population
- ◆ 46% of individuals with learning difficulties
- ◆ 33% with ADHD
- ◆ 33% with Autism
- ◆ 55% with head injury, concussion, whiplash

The Irlen Method is scientifically proven to correct the issues related to Irlen Syndrome and is supported by experts in the fields of education, psychology, medicine, ophthalmology, and neuroscience around the world.

« The Irlen Method is not a cure for autism, dyslexia, ADHD, or other problems. It removes a layer called visual perceptual overload. As a result, the individual is better able to function in specific areas which before were problematic. But the child's other difficulties will remain, and need to be addressed by other interventions. »

-Helen Irlen

WHO WE HELP

The Irlen Method provides a unique service for some children and adults identified with reading and learning difficulties, low motivation, attention deficit disorder, or discipline problems. Even good readers and gifted students can be helped.

CORRECTING Irlen SYNDROME CAN RESULT IN THE FOLLOWING IMPROVEMENTS

- ◆ Better comprehension
- ◆ Read faster and longer
- ◆ Improved accuracy
- ◆ Reduced strain and fatigue
- ◆ Reduced headaches and migraines
- ◆ Improved flow and fluency
- ◆ Improved motivation
- ◆ Improved academic performance
- ◆ Better attention and comprehension
- ◆ Better self-esteem
